

CLIMATE CHANGE POLICY BRIEFING

Thursday 10 September - 10:00 & 17:00 SAST

IUCN has just released the final list of motions for the [World Conservation Congress](#) (7-15 January 2021). These [motions](#) will be voted on by IUCN members—South Africa included and more than 1300 state and government agencies, civil society groups, and indigenous peoples' organizations. If adopted, these motions will shape and guide future IUCN policy. Of the 120 final motions, 25 of them relate to accelerating climate change mitigation and adaptation.

On 10 September, IUCN SSC Climate Change Specialist Group (CCSG) Policy Theme Lead [Victoria Romero](#) will lead an exclusive webinar, co-hosted by the CCSG and South African National Parks, to provide a broad overview of international climate change policy and walk through some of the key climate change related motions that will be voted on in the coming months. Victoria will begin with a brief introduction to the international realm of climate change policy. She will discuss the relevant international frameworks and conventions, how they interact, and opportunities for engagement. The remainder of the webinar will focus on the climate change specific motions that will be opened for voting during the Congress. There will be time left at the end of the presentation for questions and discussion.

The presentation will be given twice, at 8:00 and 15:00 GMT, to make it accessible for all our members around the globe. Each session will be introduced by CCSG Chair Wendy Foden. We really hope you can join us! Further details below.
