

AQUNION

RESEARCH AND DEVELOPMENT COORDINATOR (HERMANUS, WESTERN CAPE)

Aqunion (Pty) Ltd is a dynamic, growing company that farms South African abalone for the Asian market. The company currently has two farms and a processing facility in the Overberg Region. We have a position available for a Research & Development Coordinator to be based in, or around, Hermanus.

The primary purpose of the position is to contribute to the overall success of Aqunion by supporting on-farm innovation and development through the setting up and management of scientifically sound experiments and investigations. As Research & Development Coordinator you would be a key part of a dynamic and passionate team that aims for excellence.

Minimum requirements and competencies for this position include (but are not limited to) the following:

- Grade 12 with Tertiary Qualification (Biological/Zoological/Agricultural);
- Aquaculture experience / knowledge will be beneficial;
- Adequate experience / exposure to scientific experimentation;
- Supervisory and business unit management experience will be beneficial;
- Fluency in at least English to communicate effectively and write professional reports in English;
- Computer Literacy: Intermediate – advanced, specifically MS Word / Excel applications;
- Excellent analytical skills and experience with statistical analysis;
- Attention to detail;
- A valid driver's license;
- Contactable references are a must.

A market related remuneration package is offered and the company supports the Employment Equity legislation. Please forward application with reference: **AHO-R&D/JULY21** by email to careers@aqunion.co.za **Please state your expected remuneration package per annum in your application.**

Closing date: 02 August 2021

Commencement: As soon as possible.

If not contacted within 14 days after closing date, please consider your application unsuccessful.
