GRONEN 2026: Key Insights and Opportunities

This talk reflects on key insights from the GRONEN 2026 conference in Barcelona, including emerging directions in sustainability research, transdisciplinary approaches, and opportunities for future collaboration and practical application.

Dr Christo Rautenbach is Chief Engineer in the Integrated Catchment Management Directorate at Waikato Regional Council. He holds PhDs in Applied Mathematics and Physical Oceanography and has extensive experience in environmental modelling, climate resilience and multidisciplinary research.

Reflecting.
Connecting.
Acting.

Great discussions, fresh perspectives, and a shared commitment to rethink sustainability for a disrupted world.
