

ANNOUNCEMENT: 14TH INTERNATIONAL PHYCOLOGICAL CONGRESS

Rimini, Italy, 10-14 September 2029

Venue: Palacongressi di Rimini

Managed by Symposia srl, with the support of Rimini Riviera Convention Bureau

Convener: Fabio Rindi (Polytechnic University of Marche).

Local Organizing Committee: Stefano Accoroni (Polytechnic University of Marche), Giuseppina Alongi (University of Catania), Roberta Congestri (University of Rome Tor Vergata), Anna Maria Mannino (University of Palermo), Laura Pezzolesi (University of Bologna), Diana Sarno (Zoological Station Anton Dohrn, Naples), Saverio Savio (University of Rome Tor Vergata), Fabio Rindi (Polytechnic University of Marche).

International Phycological Congresses have been run since 1982, convened every four years by the International Phycological Society. IPCs are large international conferences covering all aspects of algal biology. They are vibrant venues gathering phycologists from all around the world, in which the most recent and exciting advances in algal research are presented.

In September 2029 the International Phycological Congress will be held for the first time in Italy, in the city of Rimini. Located on the northern Adriatic coast of Italy, Rimini is a popular tourist destination, well known as a welcoming and hospitable city. Since the mid-1970s, the destination has established itself as an important hub for business tourism, offering state-of-the-art facilities for high-level conferences and conventions.

The 14th International Phycological Congress will be held at the Palacongressi di Rimini, a large, modern and environmentally friendly facility with capacity to host conferences with up to 3,000 participants.

Rimini: the best of Italy in one place! <https://www.youtube.com/watch?v=MCICVM4dDHc>
