

INVITATION

The Dark Side / the Bright Side of Jellyfish A lecture by Professor Delphine Thibault

Dr Delphine Thibault is an Associate Professor at the Aix-Marseille Université's Mediterranean Institute of Oceanography in Marseille, France. She is a Zooplankton researcher looking at diversity, invasive species, as well as physiology and ecology of organisms drifting in the ocean – from microscopic crustaceans to much larger gelatinous zooplankton. Dr Thibault has been in the field for more than 20 years, and is a regular visiting scientist to Cape Town.

Join her for an exciting presentation on the dark and bright sides of jellyfish – given as part of the 6th International Jellyfish Blooms Symposium at the Iziko South African Museum!

Date: Wednesday, 6 November 2019

Time: 12h00

Venue: TH Barry Lecture Theatre, Iziko South African Museum
